

Clara Durodié is a technology strategist specializing in applied artificial intelligence (AI) in financial services, with a focus on business profitability with ethical AI.

She is internationally recognized for her expertise, advising Boards of leading financial institutions, think-tanks, governments, and academia. She also mentors AI startups on funding and growth strategy.

She is consistently named on numerous global lists of leading women in fintech, and is the Chair of the **Non-Executive Directors Board's** special committee on Best Practice for AI Adoption (UK) and a member of **IEEE Global Initiative on Ethics of Autonomous and Intelligent Systems** (USA). Clara has advised the **World Economic Forum's** 4th Industrial Revolution Centre in San Francisco (**US**), the All Parliamentary Party Group for Artificial Intelligence (**UK**) and the Ministry of Internal Affairs and Communications' special commission on Artificial Intelligence (**Japan**). In June 2018, Clara was also appointed as a **member of the European Union Artificial Intelligence Alliance**, an EU governmental body.

Clara is a frequent presenter at leading conferences around the globe, including SIBOS, Money 2020, Innovate Finance Global Summit, AI World and at **London Business School** where she addressed an audience from leading universities around the world such as **Harvard, Stanford, MIT** and **Cambridge**.

She has been invited as guest lecturer by leading universities like the **University of Oxford's Executive MBA, London Business School** and **Massachusetts Institute of Technology**. Clara also teaches at the **Oxford Artificial Intelligence** course, organised by the **University of Oxford**.

Clara is the **author** of **Edge of Progress - how AI is transforming financial services** the first guidebook on AI in financial services for C-level, Boards and decision makers (to be published in the fall 2019)

In 2015, Clara started scoping the research for her PhD which sits at the intersection of neuroscience, artificial intelligence and asset management. Her focus is on how episodic memory informs how people save and invest. In her corporate life, Clara served in leadership roles in European asset and wealth management in the UK, Switzerland and Luxembourg. Clara is a member of the **Chartered Institute for Securities and Investment (UK)**, has a **Certificate in Investment Management (UK)** and holds a Master's degree from the **University of Oxford**.
